

A bottle of agave spirit is being poured into a crystal glass. The liquid is captured in mid-pour, creating a dynamic splash of bubbles and droplets. The background is a soft, golden sunset over a body of water, with the sun low on the horizon. The overall mood is warm and sophisticated.

— A QBS PRODUCT FAMILY

Agave *Blenders*

TTB approved 100% agave spirit-based blenders. The hero category for premium tequila- and mezcal-character RTDs, bottled spirits, and craft cocktail programs.

PRODUCT SPEC SHEET | Custom Formulation · \$5010 Eligible

America's *Agave Specialist*

Quality Beverage Solutions is the premier U.S. based turn-key partner delivering authentic 100% agave spirit-based blenders, bulk agave spirits, and scalable ingredient solutions for the beverage alcohol industry. Our platform helps brands improve product economics, strengthen supply chain reliability, and reduce exposure to tariff and cross-border volatility.

UNIQUE BENEFITS

<p>01</p> <p>100% Agave Spirit Base</p> <p>No artificial flavors. Authentic agave spirit at the core of every blender, delivering genuine agave character that can be tasted in the finished product.</p>	<p>02</p> <p>TTB Approved and Easy to Implement</p> <p>TTB-approved solutions designed for efficient integration into existing formulations and production environments.</p>	<p>03</p> <p>Supply Chain Advantage</p> <p>Reduce dependency on imported ingredients while gaining access to a scalable U.S.-based supply platform.</p>
<p>04</p> <p>Cost & Logistics Edge</p> <p>High-proof products maximize yield, reduce shipping and storage requirements, and can generate 50–75% savings versus traditional alternatives. §5010 Tax Credit Eligible.</p>	<p>05</p> <p>Turn-Key Partnership</p> <p>Ingredient sourcing, formulation support, supply chain expertise, and commercialization resources through a single partner.</p>	<p>06</p> <p>U.S.-Based Supply</p> <p>Designed to reduce exposure to tariff volatility, cross-border disruptions, exchange rates and sourcing uncertainty.</p>

The *Family*

Five core character profiles span the agave spectrum — from bright unaged tequila to smoke-forward mezcal and barrel-aged reposado and añejo. Each is TTB approved and ready for deployment in spirit-, wine-, or malt-based formulations.

◆ **Tequila Blender**

Profiled after a traditional mixto tequila with authentic cooked agave, citrus, mineral, and white pepper notes. Designed to enhance RTD and cocktail formulations with recognizable tequila character while improving product economics.

◆ **Mezcal Blender**

Authentic mezcal-inspired agave profile delivering natural smoke, minerality, and earthy complexity. Provides a scalable and economical alternative for mezcal-character beverage development.

◆ **Reposado Character**

Oak, vanilla, and toasted agave. Engineered for aged-tequila character without barrel inventory or aging time.

◆ **Añejo Character**

Caramel, dark oak, and dried fruit. Premium aged profile for ultra-premium RTD and cocktail applications.

◆ **Custom Blender**

Tailored spirit solutions developed around your desired flavor profile, cost objectives, and production requirements—from agave applications to whiskey, rum, and other spirit-inspired profiles.

APPLICATIONS

Where QBS Blenders *Go to Work*

Spirit-Based RTDs Engineered for spirit-based RTDs, our agave blenders deliver authentic agave character, lower ingredient costs, scalable long-term supply, and potential federal excise tax advantages for qualifying products.	Wine-Based RTDs High-proof agave solutions designed to replace traditional OTS and other wine bases, delivering authentic agave character, improved yield, and potential federal excise tax advantages for qualifying products.
Malt-Based RTDs Delivers authentic agave flavor to malt-based RTDs without changing the underlying malt-base classification, enabling cost-effective product innovation and differentiation.	Bottled Spirits Tequila, mezcal, and agave spirit lines using QBS blenders to enhance authenticity and unlock §5010 credit.
Mixers & Concentrates Bar-grade mixers, frozen-machine concentrates, and back-of-house cocktail programs.	Private Label & Co-Pack Turn-key formulation supporting private label and co-packer programs at any scale.

CUSTOMIZATION & PARTNERSHIP

Engineered to *Your Filing*

Every QBS engagement starts with your TTB filing — or a target product profile if you're at the concept stage. We tune three variables to your margin and regulatory pathway, then deliver a complete documentation package:

- ◆ Tailored solutions developed around your target flavor profile, cost objectives, and production requirements
- ◆ Collaboration with your R&D team, flavor house, or formulation partner to achieve the desired finished products
- ◆ Pilot quantities through full commercial production volumes
- ◆ Flexible packaging options matched to your operational requirements
- ◆ Evaluation of ingredient, logistics, storage, and supply-chain economics relative to current sourcing alternatives
- ◆ Supporting documentation, certifications, and implementation resources provided through QBS and specialized industry partners
